

ALESSANDRO MANTOAN

+39 338 9191255 · alessandro.mantoan.dp@gmail.com · [Website](#) · [LinkedIn](#) · Turin, Italy (Willing to relocate)

Graduated with honors in Audiovisual Heritage and Media Education Sciences, specializing in the conservation and restoration of audiovisual materials. I gained hands-on experience in a restoration lab, following the entire process: from physical inspection and diagnostics to scanning, digital image restoration, and the production of preservation masters. Skilled in archive management, metadata cataloging according to international standards, and color grading/color correction.

PROFESSIONAL EXPERIENCE

Intern — Audiovisual Conservation and Restoration

La Camera Ottica Media Preservation and Restoration · Gorizia, Italy · 2024-2025

- Physical inspection, cataloging, and repair of film materials
- Scanning and digitization (Blackmagic Cintel Scanner)
- Digital image restoration (Diamant - Film Restoration)
- Color correction and color grading (DaVinci Resolve)
- Philological reconstruction of the film
- Production of access and preservation copies

Projects

La guerra d'Italia a 3000 metri sull'Adamello (Comerio, 1916)

- Philological reconstruction of the film; I handled the segmentation and creation of technical decoupages of the film's surviving copies, in preparation for the subsequent comparison and reconstruction of the lost 1916 edition.

La spedizione Franchetti nella Dancalia etiopica (Craveri, 1929)

- Digital image restoration using Diamant Film Restoration.

La battaglia dall'Astico al Piave (1918)

- Reconstruction of the film's original color, through flatbed scanning of frames identifying tinting and toning using a color checker, followed by color reconstruction in DaVinci Resolve. The project aimed at a technical and methodological comparison against an initial color reconstruction carried out through photographic acquisition of color references.

ACADEMIC EDUCATION

Master's Degree in Audiovisual Heritage and Media Education Sciences

University of Udine · 110/110 with honors · 2025

Bachelor's Degree in Sciences and Technologies for the Study and Conservation of Cultural Heritage and Information Media

University of Milan · 98/110 · 2021

PERSONAL PROJECTS

Digital film archiving system, based on the OAIS preservation model and on relational databases accessible online via a web interface. The project involves the use of Python scripts for renaming and ingesting audiovisual material in digital format into the archive structure (three information packages: SIP/AIP/DIP), the generation of descriptive and preservation XML metadata for the film and its constituent scenes (MODS/PREMIS/DC), and the construction of an accessible, queryable database.

The project, still under ongoing development, is accessible at the following [link](#). For more information, you can visit the [website](#).

SKILLS, TOOLS AND LANGUAGES

AREAS OF EXPERTISE

- Conservation of audiovisual cultural heritage and time-based media
- Digitization and digital archiving
- Management of formats, codecs, and preservation standards
- Digital restoration of film and video
- Diagnostic analysis of cultural heritage materials
- Video editing and post-production

PROGRAMMING LANGUAGES AND STANDARDS

- Python · XML
- Dublin Core / MODS / PREMIS

SOFTWARE AND TOOLS

- DaVinci Resolve
- Diamant Film Restoration
- Adobe Photoshop
- TouchDesigner
- LaTeX
- SQL

SPOKEN LANGUAGES

- Italian
- English
